

The following is an introduction to noteworthy feature of APEXFIZ Design software version V-07.

Supported [Seamline] in 3D Mapping Editor > 3D Loop Simulation

■ Supported Plans: [Design-Knit](#) [Design Pro](#) [3D \(option\)](#)

When performing 3D Loop Simulation, it is supported to express imitational seam lines in 5 levels.

Supported API in Design software

■ Supported Plans: [Design-Standard](#) [Design-Knit](#) [Design-Weave](#) [Design Pro](#) [3D \(option\)](#)

Some of the 3D-related menus of Design software can now be executed via API. Through externally created applications and systems, it is possible to automate software operations and link with other systems.

Following functions are available by API.

- Export 3D data
- Load 3D data
- Save 3D data
- Import metadata
- Set material
- 3D Loop Simulation
- Exit 3D Mapping Editor
- Quit Design software
